Team Dover...Delivering today's airlift!

A Team Dover C-5M Super Galaxy recently moved an 87,000-pound Grauntech Shredder to Kandahar Airfield, Afghanistan. The 525 HP Mobile Rotogrind Shredder assembly is used to shred everything from paper and electronics to body armor and ballistic glass in a matter of seconds. Giant Shredders don't usually attract too much attention but as we accelerate the pace of retrograde, this item is essential! It will reduce the tonnage coming out of the AOR and the scrap it produces will return money to the U.S. Treasury.

This marks the first time this equipment has ever been moved via Air Cargo. A

smaller version of this was moved by an Antonov An-24 2 years ago, but the Super Galaxy and Team Dover was required to pull this move off!!

Leadership Pathways IS...forging tomorrows leaders!

Our Air Force is a continually changing force, we don't know what the Air Force will look like in 10 years. This is the reason our mission statement is so important; **Delivering today's airlift...forging tomorrows leaders.** The deliberate development of our Airmen and their families will help prepare them to live and lead in tomorrows Air Force. A great tool has become available on social media to nurture this effort. The Dover AFB Leadership Pathways Facebook page.

The Facebook page enables Airmen & family members the ability to view and sign up for Leadership Pathways courses without a CAC. This is just one of the many recent changes in Leadership Pathways. We now have a Committee of SNCO's from across the wing to strategically develop curriculum that is important to our Airmen and their families. The theme for May is "The Professional Airman."

16 May - 1400-1600 - EPR Writing (9th AS Auditorium)

20 May - 1200-1400 - The Supervisor (Bldg 760, 2nd Floor Auditorium)
