Construction outside the Main Gate

Wondering what the construction is just outside the main gate and how long it is going to last? I'm sure the Chief and I aren't the only ones to notice a delay getting to work in the mornings, and we are aware that the housing gate is experiencing some delays as well. So here is the scoop...The Delaware Department of Transportation (DELDOT) is resurfacing all the on and off ramps and restructuring sidewalks to bring them up to new ADA standards. What is ADA? It's the Americans with Disabilities Act (ADA)...a federal civil rights law prohibiting discrimination against individuals on the basis of disability.

Once the work on the sidewalks is complete, they will mill and overlay the ramps (all 4). To cut down on the delays we are currently experiencing, they plan to work at night to repave the ramps. No work will be done to the actual bridge crossing and the estimated completion date from DELDOT is 31 July.

Thank you for your continued patience and understanding during this construction.

We are Never too busy to do it right!

No one in our Wing is ever too busy to do the right thing...and if you think you are, please think again. Our country depends on us to do the right thing in all that we do.

Unfortunately, we've seen quite a few mishaps recently that could have been prevented...and I'm just talking about the hi-vis mishaps that made it up to the Headquarters level. What about your work center? Have you witnessed someone operating outside the established guidance? What did you do when someone "bent" the rules or took short cuts? The Chief and I hope you are taking action and discussing this with your supervisors, peers, and those subordinate to you.

What I want to emphasize is that doing the right thing is a requirement as we work together to accomplish the mission. We have all heard the saying "Safely, by the book, and then on time," right?

Thank you for all that you do!

Rick L. Dandy
"Deliver!"
